Q

Support pour les services bluetooth additionnels.

For another device like a smartphone to use any of the Bluetooth "services" which the micro:bit has, it must first be **paired with the micro:bit** (/reference/bluetooth/bluetooth-pairing). Once paired, the other device may connect to the micro:bit and exchange data relating to many of the micro:bit's features.

Q

contenu quand le caractère de délimitation indiqué est

rencontré.

Imprime une valeur numérique via le port série.

uartWriteNumber

Q

Advanced

Pour des informations plus avancées sur le service UART Bluetooth du micro:bit incluant les informations sur l'utilisation d'un smartphone, consultez la documentation technique d'exécution du micro:bit à l'Université de Lancaster (http://lancaster-university.github.io/microbit-docs/ble/uart-service/)
